

# AV EcoCarb™

## Introducing EcoCarb Sustainable Carbon Water Filtration Medias

EcoCarb Media is produced from byproducts of other manufacturing processes. Therefore, using EcoCarb is friendly to the environment and offers superior performance eliminating contaminants from drinking water. Each EcoCarb Media is selected for the specific water quality and use case.

### KEY BENEFITS:

Environmentally Friendly

Secured Supply Chain

Superior Performance

## Let Us Recommend the Most Efficient Media for Your Water

### EcoCarb 1240BA

Produced from bituminous coal sourced from a remediated coal refuse site. Provides a lower pressure drop reducing energy costs.

### EcoCarb 1230C and 1240C

Produced from a renewable source, coconut shells, which remove CO2 from the atmosphere during the growing stage.

### EcoCarb 1240LDX and 830LDX

A co-product extracted during the manufacturing process of a pigment.
