## MEDIA EXCHANGE SERVICES

# Why drain your time or your resources?

Getting a system back up and operational is critical during a high-demand season. Our fleet of technicians arrive with the tools and expertise needed to get the job done right.

### SERVICES PROVIDED

**Media Removal &  
Environmentally  
Safe Disposal**

**System Assessment  
& Inspection Report**

**Media Loading  
& Conditioning**

**Full System  
Testing**

*"I've been amazed at how AV's carbon life cycle is so superior, longer lasting, than carbon in other vessels. The design really matters in how long the media lasts, and that's important because the cost ultimately goes back onto shoulders of ratepayers."*

Tim Doyle  
Assistant Public Works Director of the City of Tulare, California

# From media selection to lifecycle management, AqueoUS Vets has you covered.

Media analysis and selection is critical to the success of a project and greatly impacts overall O&M costs. We have extensive experience selecting granular activated carbons, ion-exchange resins and other specialty media used to treat drinking water for both municipal and private utilities. The media we select is based on application and site water quality.

AqueoUS Vets provides a comprehensive range of media services. With our experienced team and extensive resources, we handle on-site media exchange and disposal, nationwide.

CONTAMINANT	MEDIA
PFAS	Coal Carbon
	IX Resin
	Specialty Media
1,2,3-TCP, TCE, PCE	Coal and Coconut Carbons
TOC	Coal Carbon
Arsenic	Specialty Media
Chromium 6	IX Resin
Perchlorate	IX Resin

*Reshaping the way people think about water treatment.*
